

Ways to Connect with Visitors in a Streaming Environment

1. Be careful to greet people at the beginning of the worship service.
2. Have one or two people monitoring comments made in the midst of worship and responding back.
3. Create a simple online-form using [Google Forms](#) or [Microsoft Forms](#). Provide links to the form and encourage people to complete it as part of the welcome at the beginning of worship. BTW, you can record a YouTube greeting and include them in these forms.
 - a. [Sample Google Form](#)
 - b. [Sample Microsoft Form](#)
4. Create online “Office Hours” where the pastor or staff person will be available via an open Zoom call where people can “drop in” and visit with someone. Obviously, this gets tricky with confidential concerns.
